DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 30 and 31 rejected under 35 U.S.C. 102(b) as being anticipated by Yoneya et al. (U.S. 6,300,926).

Yoneya et al. discloses an active matrix IPS-type liquid crystal display device.

Note in figure 1, the gate line GL, data line DL, pixel electrodes PX and common electrodes CT. The comb shaped pixel electrodes and comb shaped common electrodes are disposed at fixed intervals from each other. Yoneya et al. discloses both a gate driver and drain signal driving circuit. See column 8, lines 59-65 and column 25, lines 24-28. Figure 6, shows a waveform diagram illustrating the driving scheme.

As to claim 32, note in figure 1, the storage capacitor Csta formed in each pixel region. See column 16, lines 7-22.

Allowable Subject Matter

Claims 33-35 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record did not teach or suggest the recited driving details.

Claims 1-17 and 29 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record did not teach or suggest that the thin film transistors are formed at crossing points of the gate and data lines to be alternately positioned along the lower and upper side pixel regions adjacent to corresponding gate lines.
